We are an adult dentistry office with two office locations on Oahu, Kailua and South King St. We focus on adult reconstructive, denture and implant dentistry. The majority of procedures done in our office are performed under oral sedation. For about 60% of our new patients it has been a very long time and many years since they had seen a dentist or sought any form of dental care. They know that "It's time" but have been putting it off for one reason or another. We are able to accomplish a lot of dentistry in a very short time because of a staff versed in communication skills, technology, techniques, oral sedation, and the realization that people ultimately seek what is the best for themselves. People making their own choices when totally comfortable... It makes things easier.
